

SureTemp® Elite // Metalized + Hollow Fiber

Container Blanket

Reusable Solution

SureTemp® Elite-Performance Container Blanket offers the highest level of protection during products' exposure to extreme temperatures. Designed for FTL/FCL top load protection against both cold and heat in your cold chain.

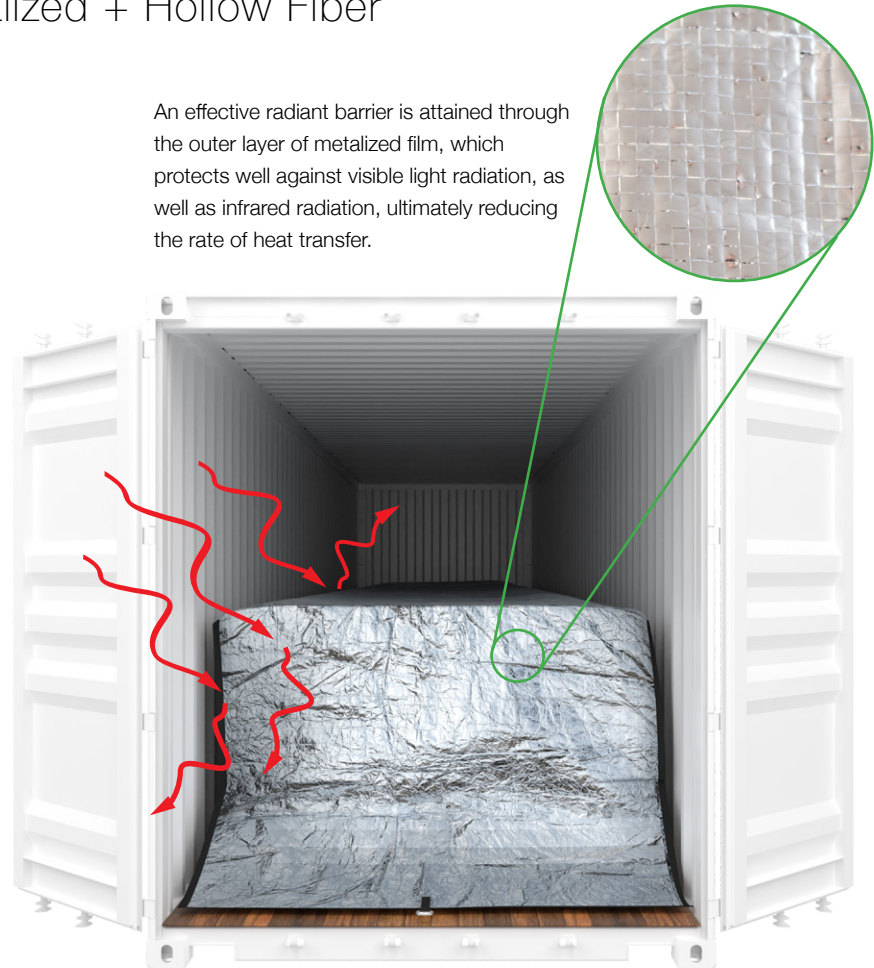

Solar Reflectance:	84%	(ASTM E1980)
Emittance:	.47	(ASTM C 1371)
Thermal Resistance:	R 2.5-5	(ASTM C 518)

Why Choose *Elite* Metalized?

- Cost Savings Alternative vs. Refrigeration
- Protects Against Excessive Ambient Heat
- Reusable / Durable
- Reduces Carbon Footprint
- Quick & Easy On/Off Installation
- Enhanced Shipment Security

An effective radiant barrier is attained through the outer layer of metalized film, which protects well against visible light radiation, as well as infrared radiation, ultimately reducing the rate of heat transfer.

Woven polyethylene's high tensile strength and tear-resistance give the product additional physical protective capabilities and contribute to its durability and reusability.

Inside is our hollow-fiber insulation – the SureTemp® brand's highest level of insulating material – between woven polyethylene layers.
